THREE STEPS TO A SUCCESSFUL HOME RENOVATION PROJECT.

STEP 1:
In-Home Consultation

STEP 2:
Designs, Selections & Pricing

STEP 3:
Manage & Oversee Construction

Beautiful renovations don't just happen. They require a lot of work, foresight and planning. If you don't do this kind of work every day, you may need help visualizing the end result. You may need help choosing fixtures that work together correctly. And you will definitely want help on the job site once construction begins. At Acadian House Kitchen + Bath, we do this every day. And we will hold your hand every step of the process.

Our first step is an in-home consultation. We look, we listen and we learn what is important to you. Our team of designers knows what works and what doesn't. We can anticipate problems unique to your space and formulate solutions that stay within your budget.
